Work Experience & Projects

○ 2024 - 2025

Web projects

HeavenNest, an Airbnb Like

- Developed using **Ruby on Rails**, **PostgreSQL**, **Active Record** and **Stimulus**.
- Used **Active Storage** for efficient image uploads and retrievals.
- Implemented **Devise** for secure user authentication and management.
- Used **Stimulus** for enhanced frontend interactions and user experience
- Built dynamic, responsive interfaces with **Bootstrap** and **SCSS**.
- Ensured robust data validation and error handling throughout the application.
- Version Control using **GitHub** -> Repository, Branching, Pull Requests.

Vertiflor - <https://vertiflor.co.id>

- Developed a responsive platform using WordPress and Elementor.
- Custom PHP and JS to implement UI interactions and filtering features.
- Collaborated closely on UX implementation based on Figma prototypes.
- Customized theme components to match high-end brand aesthetics.
- Ensured cross-browser and device compatibility for seamless UX
- Optimized performance and asset loading (PageSpeed Score: 90)
- Version control and collaboration via Git and GitHub
